

**RAHMAN**  
JUTE SPINNERS (PVT) LTD.

## About Us

We, Rahman Jute Spinners (Pvt) Ltd. proudly introduce ourselves as one of the manufacturers of finest quality Jute Products (Yarns, Bags, Clothes etc) in Bangladesh. Our potential customers are mainly from the carpet industry. Apart from the carpet yarns we are also capable of producing yarns needed for the Jute Bag/Cloth/Rope industry as well as the shoe (Espadrille) industry. Our products are of 100% export quality and we are currently exporting to more than 15 countries across the globe.

It is a known fact that more than 80% of the world's total production of Jute is harvested in different parts of Bangladesh, however, majority of the finest quality raw jute are grown in the Northern part of Bangladesh where our factory is located.

## Background & Development

Started off as a manufacturer of jute bags (Binola, Btwill) back in 2005-06 located in the divisional city of Rajshahi (Bangladesh), namely Rahman Jute Mills Ltd. It was the first Jute Industry in Rajshahi city operated by a private sector. After successfully running this unit for almost 5 years and after gaining enough knowledge and technical 'know-how', we decided to produce Jute carpet yarns.

Rahman Jute Spinners came into operation in 2011 and gradually made a mark in the world for manufacturing the finest quality carpet yarns suitable to run on 5m looms. We are amongst the few who are capable of manufacturing NPEO/APEO (environmental friendly) jute yarns that is suitable for the carpet and bag industry (tested and approved by renowned inspection company called Intertek) and our end users have expressed their satisfaction while selling their products to big retail giants such as IKEA and Walmart (as they have zero tolerance for products that are harmful for the environment). Moreover, we have the experience to produce Vegetable Oil Treated (VOT) yarns that have no smell and the unsaponifiable matter of the yarn is well within the tolerable range (certification from SGS). These type of yarns are used to produce food grade jute bags (typically for the coffee industry) that complies with the IJO 98/01 standard which basically means that the bag is free of smell and it has no chemical substance and completely safe to use in any food grade materials.

## Workforce

We have a dedicated team of highly experienced individuals and our mission is to work together and produce team output. Around 1700 people are employed in this industry from all over Bangladesh who works tirelessly to fulfil our client's requirements to the best of their ability.

## Our Vision

To become a brand in the world of Jute and continue to serve our customers with sincerity and honesty. We believe a happy customer is a friend for a lifetime!
